Subject: ARPA - additional information

Hi Sara,
I am working on the qtrly ARPA reporting. ARPA is requesting we gather additional information for the ARPA-12 License Plate Reader Project.
Thank you for reviewing and providing the following information:

1. The SAM.GOV id for Flock Saftey
2. The point of contact email address for Flock Safety
3. Please confirm the following information for the project:

Project description:
ALPR cameras are computer-controlled cameras mounted to street poles that detect the license plates of passing motor vehicles. The information gathered is used by law enforcement to detect and recover stolen motor vehicles and arrest offenders. One of the goals is to reduce motor vehicle theft and the adverse economic impact caused to victims. Since stolen vehicles are disproportionately used during shootings, increasing the Police Department's ability to

quickly recover stolen vehicles could also have a positive impact on gun violence. Additionally, the ALPR cameras will provide an investigative tool to help identify and arrest firearm offenders after crimes have been reported. The vast majority of unlawful shooting incidents involve the suspect coming to or leaving the crime scene in a motor vehicle. ALPR cameras will provide investigative leads, increase effectiveness and efficiency, and improve enforcement outcomes

Questions on PH-NEI

*Brief description of structure and objectives of assistance program(s), including public health or negative economic impact experienced
The pandemic has contributed to many public health, economic, and societal challenges experienced by municipalities. During the period of the pandemic, the City of Santa Maria experienced significant increases in firearm related violence, and motor vehicle theft. Firearm related violence increased 34% from 2019 to 2020. Firearm related violence surged to record highs in 2021, increasing an additional 121% from 2020 to 2021.

*Brief description of recipient's approach to ensuring that response is reasonable and proportional to a public health or negative economic impact of Covid-19

During the past three years the Police Department in the City of Santa Maria has investigated more than 200 reported shootings and the theft of more than 2,600 motor vehicles. The value of the stolen vehicles alone is estimated to be greater than $9 million. The City's approach is to invest $1.2 million in license plate readers to reduce negative economic impact of motor vehicle theft, and the injuries and deaths cause by the increase in gun violence.
